

FASTRACK Primary Rate Interface (PRI) Service Plan

Customers who switch all of their local service to Company-provided local service, sign a 1, 3, or 5 year term of service agreement and maintain 8B channels during their term are eligible for this plan. Contact GCI customer service or your marketing representative.

Benefits:

- Customer receives 8B channels and 1D channel of primary rate interface.
- A 100 block of Direct Inward Dial and Caller ID are included.
- All circuits provided will be within the same trunk group.
- The initial non-recurring charge is waived.
- Customers can add and delete additional channels, up to 23B channels, on a monthly basis.

Customers will receive the credit on their local services account for each month of the commitment period. The credit is applied to FASTRACK PRI services before any taxes, regulatory surcharges, and non-recurring fee.

Customers are allowed 1 PRI per location at this plan rate. Customer must not switch any portion of their local service to another provider or block any service during the period covered by their term of service commitment.

Customer is responsible for:

1. Interface with customer's premise equipment.
2. Providing switch translation.chrages may apply if the customer either cannot provide GCI with a switch translation or if the translation provided turns out to be incorrect.

Business customers who, after GCI begins providing local service, notify the Company that they want to discontinue the service prior to the end of the term, or change a portion of their local service to another carrier, or whose service is discontinued by GCI for non-payment, will incur early termination liability in an amount equal to the credits received under this plan.

Time in excess of 12 hours to get this service to function properly will be billed at the hourly rate of \$88.00
