

Line Extension Policy

Upon a customer's application for a line extension for GCI facilities:

- GCI will design the most cost effective system for serving the applicant.
- The quote will be provided to the customer before construction begins. GCI will provide an allowance of \$1,250, for each occupied home passed by the new facility, toward the cost of the extension, which leaves the net quote. (This credit does not depend on Mr. Smith's neighbors joining the line extension request.)
- Applicant is responsible for payment of any costs above the applicable allowance.
- A line extension and service connection agreement will be in writing, include the utility's estimate of the customer's share of the costs, the terms and conditions of payment, estimated date of completion of the work, and be signed by the company and the customer or the customer's authorized representative.
- Payment will be due before construction of the line extension starts. If the actual costs of construction are less than the estimate, the difference will be refunded to the member. If the actual costs of construction are greater than the estimate the customer will not be responsible for any amount beyond the original quote in the line extension and service connection agreement.
